

## Labour - Constructive and reliable staff

N&J handle recruitment, mobilisation, administration and payroll services, allowing seconded temporary or permanent personnel to be immediately available. Employing contract staff offers your company a high degree of flexibility and controlled costs without a long-term investment. Individual daily and hourly rates are negotiable for each assignment and relate to the job specification, candidate qualifications and current market forces. N&J ensure all their personnel are fully trained, reliable and have the required CSCS certificates. Staff are available for long or short term contracts and teams are kept together for the length of the contract.
